NASA review completed.

SEP 15 1965

Dr. Albert Wheelon
Deputy Director (Science and Technology)
Central Intelligence Agency
Washington, D.C. 20505

Dear Dr. ^{B-2}Wheelon:

During the course of each fiscal year, Mr. Webb, Dr. Dryden, and I accomplish a comprehensive examination of the entire NASA program through a series of formal, internal Program Reviews. Each review session lasts a full day. The presentations are given by the Program Directors and their principal assistants. Center Directors and their staffs are frequently called on to participate. Some of the reviews are classified SECRET.

In past years, we have invited high-level representatives from two or three agencies to attend our internal reviews; however, the number has been limited by our own attendance requirements and the capacity of the Control Room. Last year, to permit us to expand the invitation list, we initiated a series of Inter-agency Program Reviews. These were held on the day following the NASA internal review. High echelon representatives from each government department or agency having a direct interest in our program were invited to attend. For the present year we are following the same procedure.

Enclosed is the Interagency Program Review schedule for this fiscal year. I should like to extend a cordial invitation to you to join us in these reviews.

We would hope that our guests will enter into our discussions in order that we may have the benefit of their thoughts and reactions. With this uppermost in mind, the cognizant Program Director and I will normally be attending these sessions.

2

It would be helpful to us in our planning if you could let us know a few days in advance of each session whether you expect to attend. We look forward to having you with us for most of the meetings. We believe you will find the content interesting and useful.

With warm personal regards,

Sincerely,

Robert C. Seamans, Jr.
Associate Administrator
